

A banner for Oracle Business Intelligence 11g. The left side is a solid red gradient. The right side features a circular collage of grayscale images showing business professionals in various settings: a man with glasses holding a pen, a group of people in a meeting, a man pointing at a screen, and others in office environments. The collage is composed of several overlapping circular segments.

Oracle Business Intelligence 11g
Most complete. Most integrated.

OBIEE 11g – Technical Architecture

Petr Podbraný
Oracle Business Intelligence Sales Consultant

Types of Installation

- **Simple Install**

- Installs with the default settings on a single computer
- Managed Server is not installed
- Reduced memory footprint
- Targeted especially for demonstration, evaluation, and PoC

- **Enterprise Install**

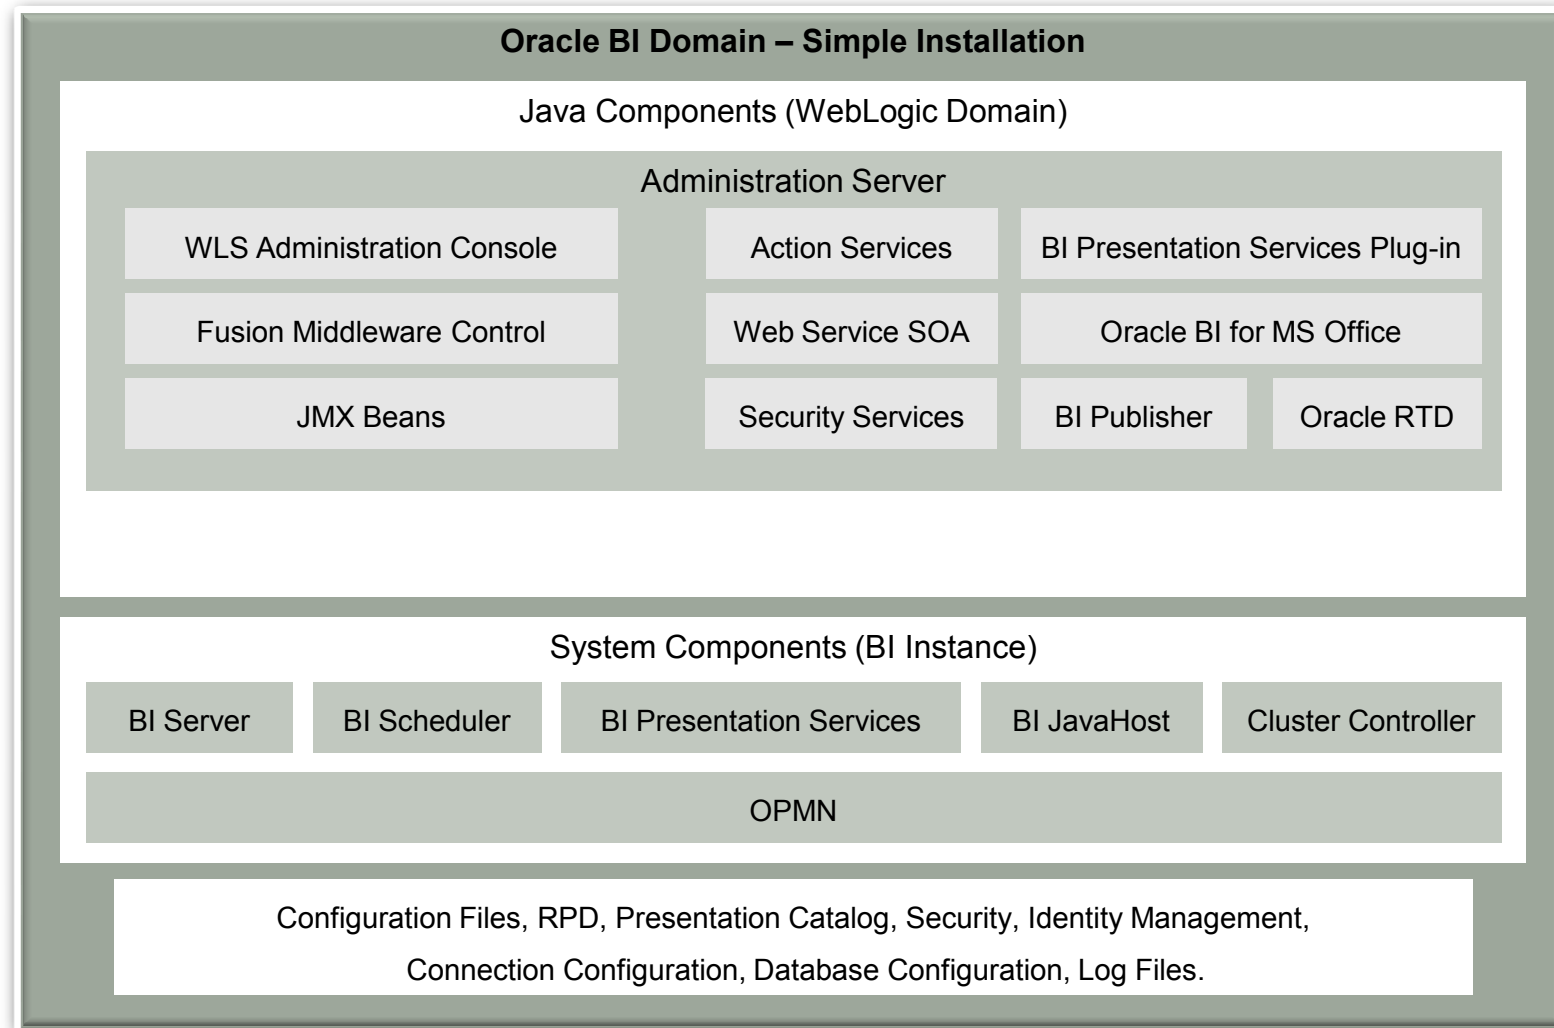

- Enterprise deployment
- Or scale out an existing enterprise
- More control over installation

- **Software Only Install**

- Installs software binary files in a Middleware home for later configuration
- Useful if your goal is to have multiple domains or products share a common Middleware home

Oracle BI 11g – High Level Architecture

Simple Installation

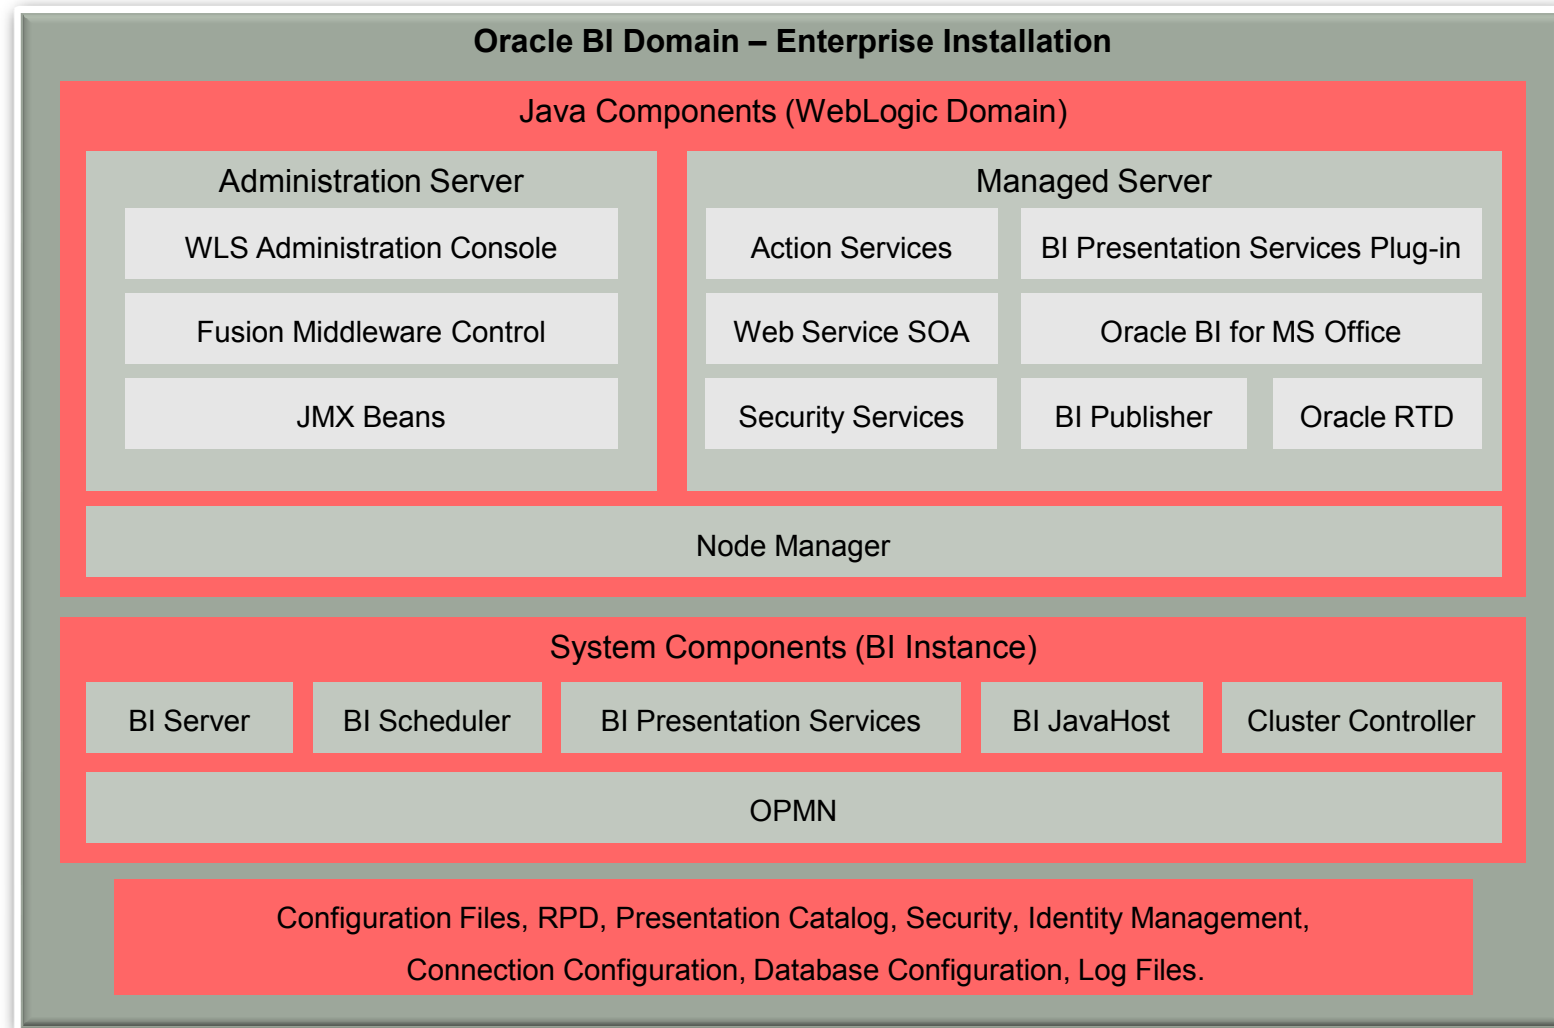

Oracle BI 11g – High Level Architecture

Enterprise Installation

Oracle BI 11g – High Level Architecture

Enterprise Installation

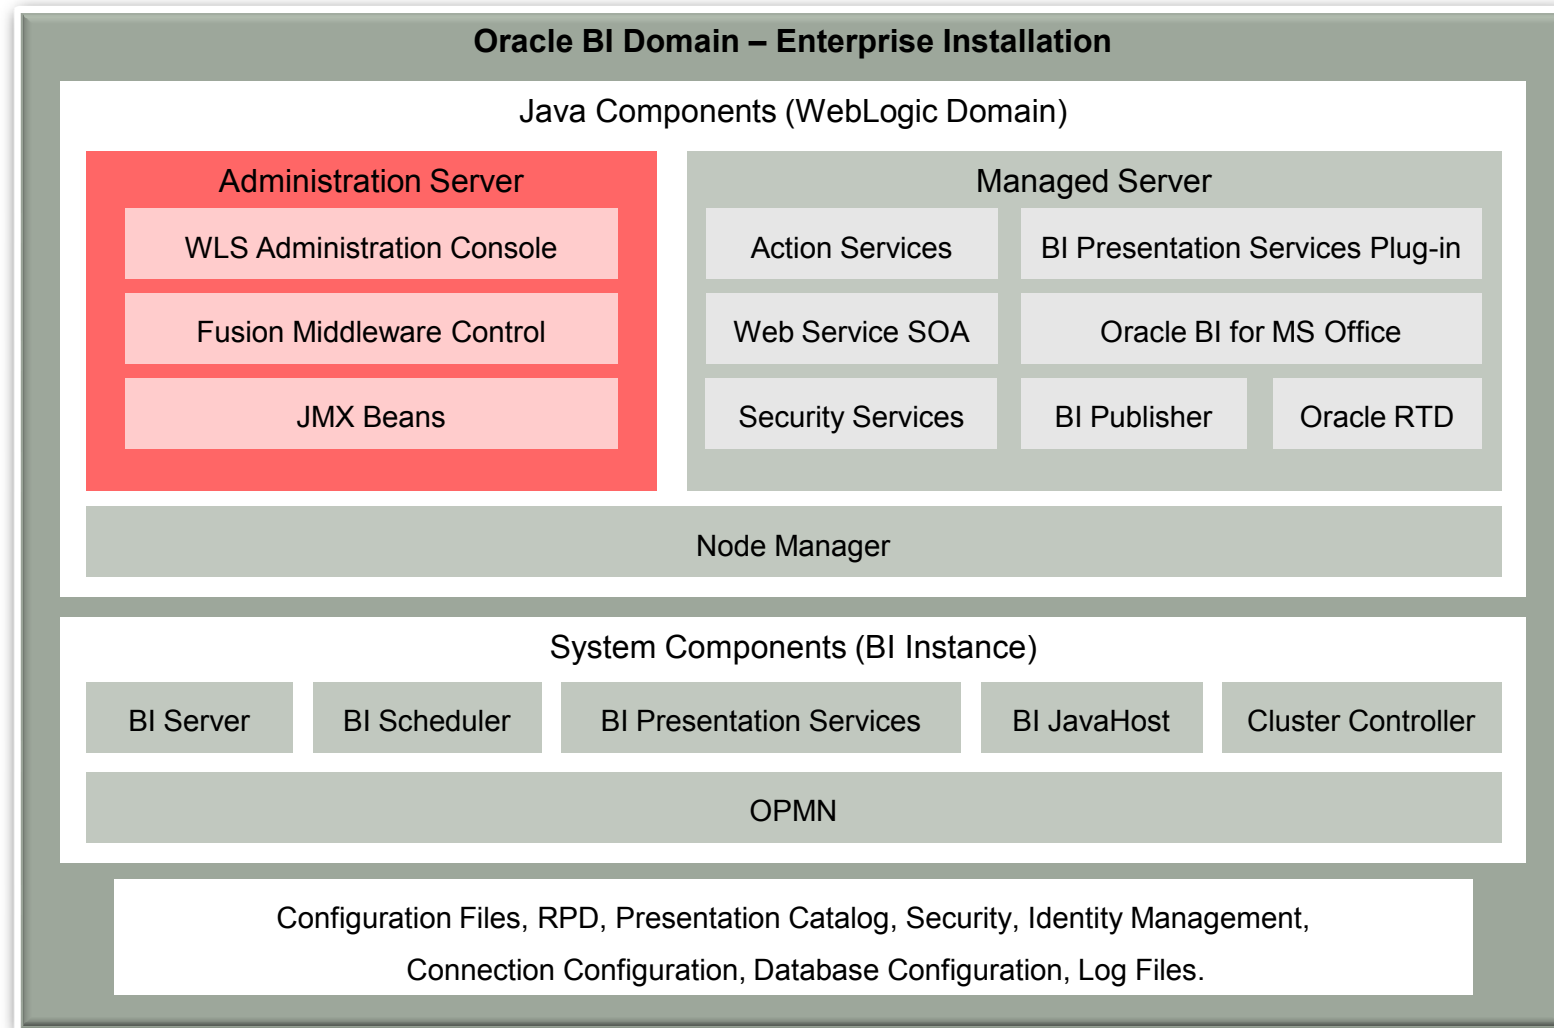

Oracle Business Intelligence Components

- **Java Components (WebLogic Domain)**
 - Deployed as JEE applications
 - To service SOAP, HTTP, and other forms of requests
- **System Components (BI Instance)**
 - Deployed as server processes
 - Provide the core services that enable OBI
- **Other Domain Contents**
 - Includes all the necessary software, metadata, configuration files, RPD files, Oracle BI Presentation Catalog, and connection and database configuration information that are required to run an Oracle Business Intelligence system

Oracle BI 11g – High Level Architecture

Enterprise Installation

Oracle Business Intelligence Components

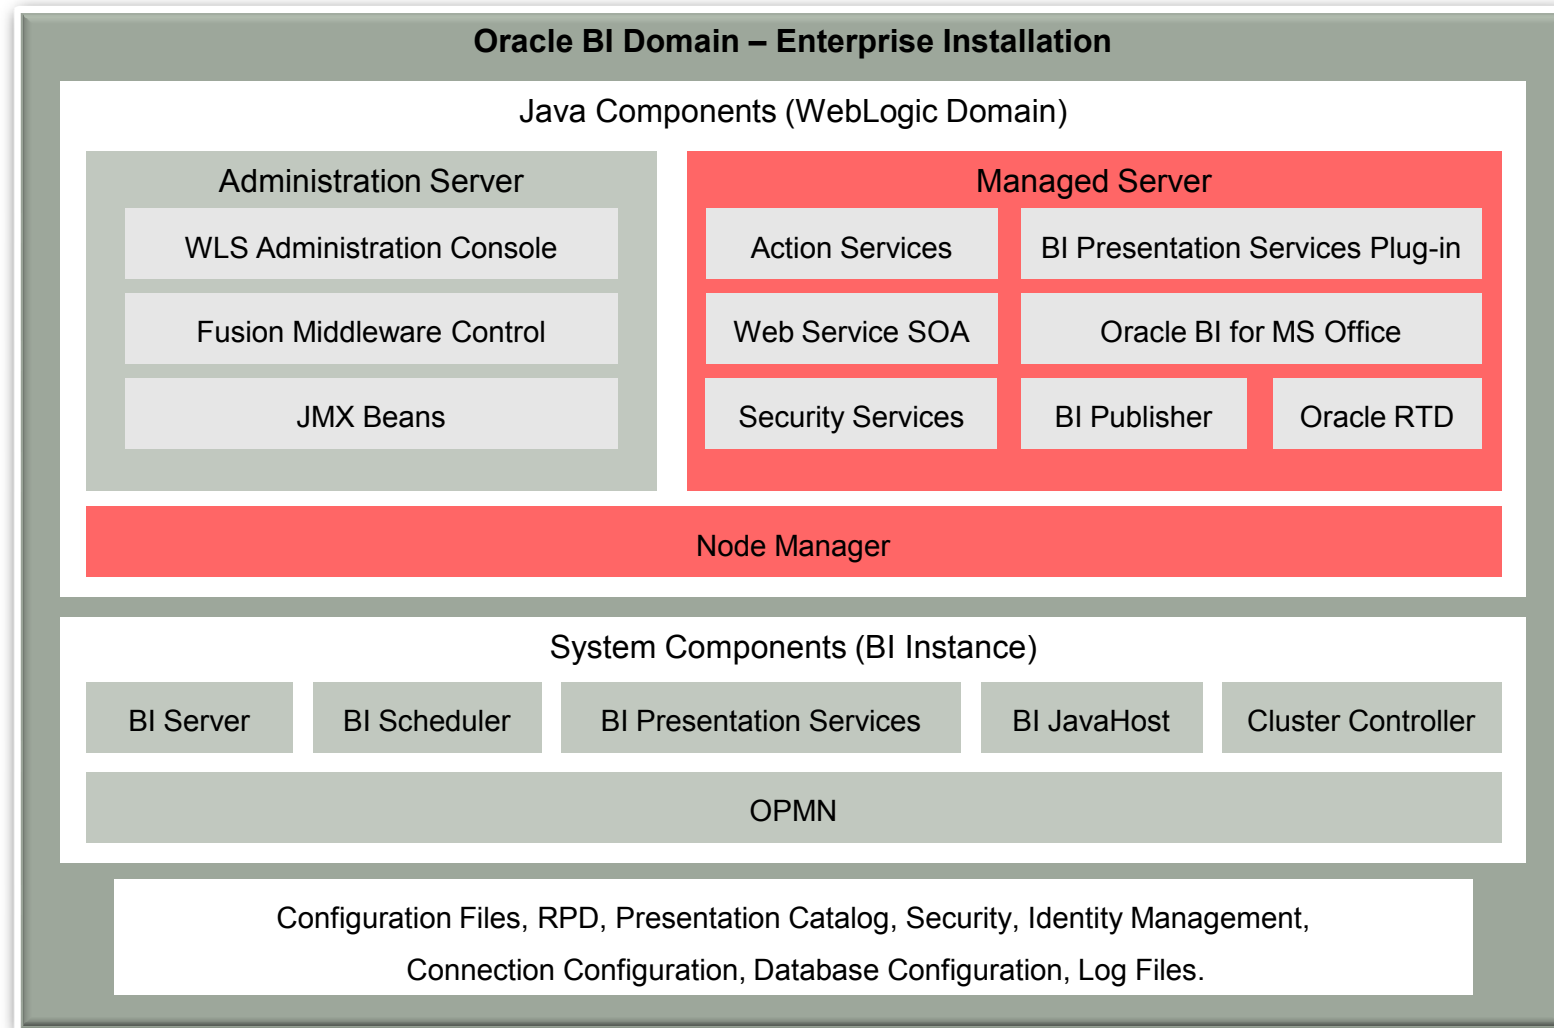

Administration Server

Components for administering the system

- **WebLogic Server Administration Console**
 - Monitoring the health and performance of JEE servers
 - Configuring WebLogic server domains
 - Stopping and starting JEE servers
 - Viewing JEE server logs
 - Managing users in the LDAP Server of the WebLogic Server
- **Fusion Middleware Control**
 - Starting, stopping, and restarting all system components and Managed Servers
 - Configuring preferences and defaults
 - Scaling out of system components
 - Providing high availability configuration and status of system components
 - Managing performance and monitoring system metrics
 - Performing diagnostics and logging
- **JMX Mbeans**
 - Provides programmatic access for managing a BI domain

Oracle BI 11g – High Level Architecture

Enterprise Installation

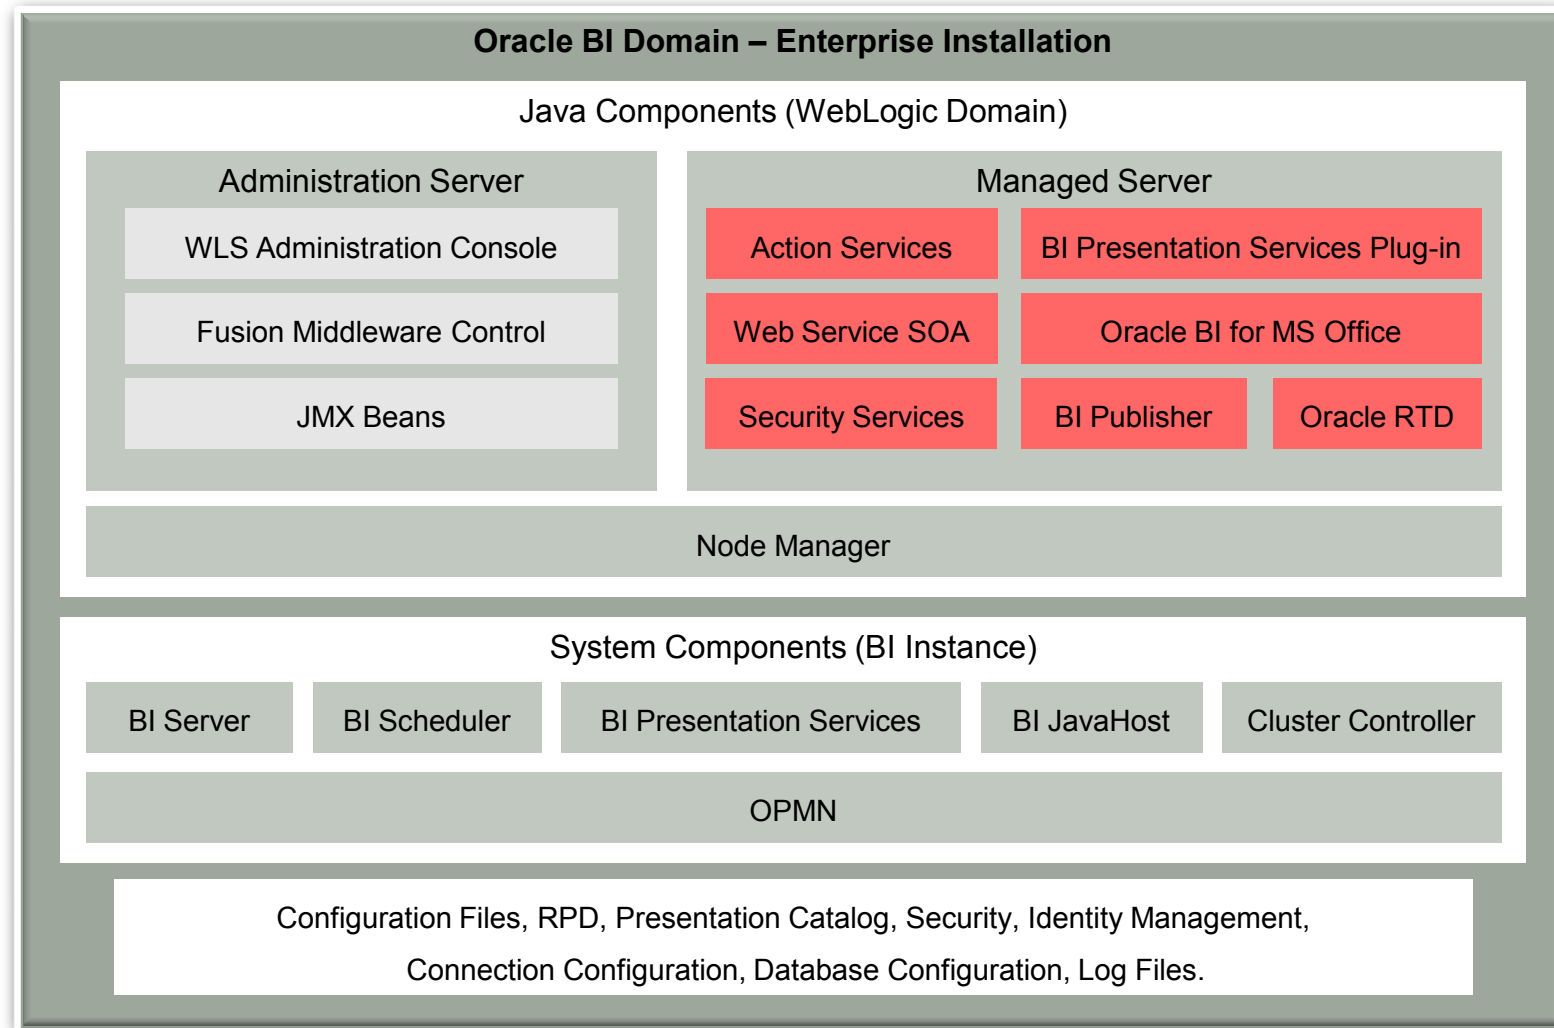

Oracle Business Intelligence Components

Managed Server and Node Manager

- **Managed Server**
 - Provides run-time environment for the Java-based services and applications within the system
- **Node Manager**
 - Process management services for the Administration Server and Managed Server processes

Oracle BI 11g – High Level Architecture

Enterprise Installation

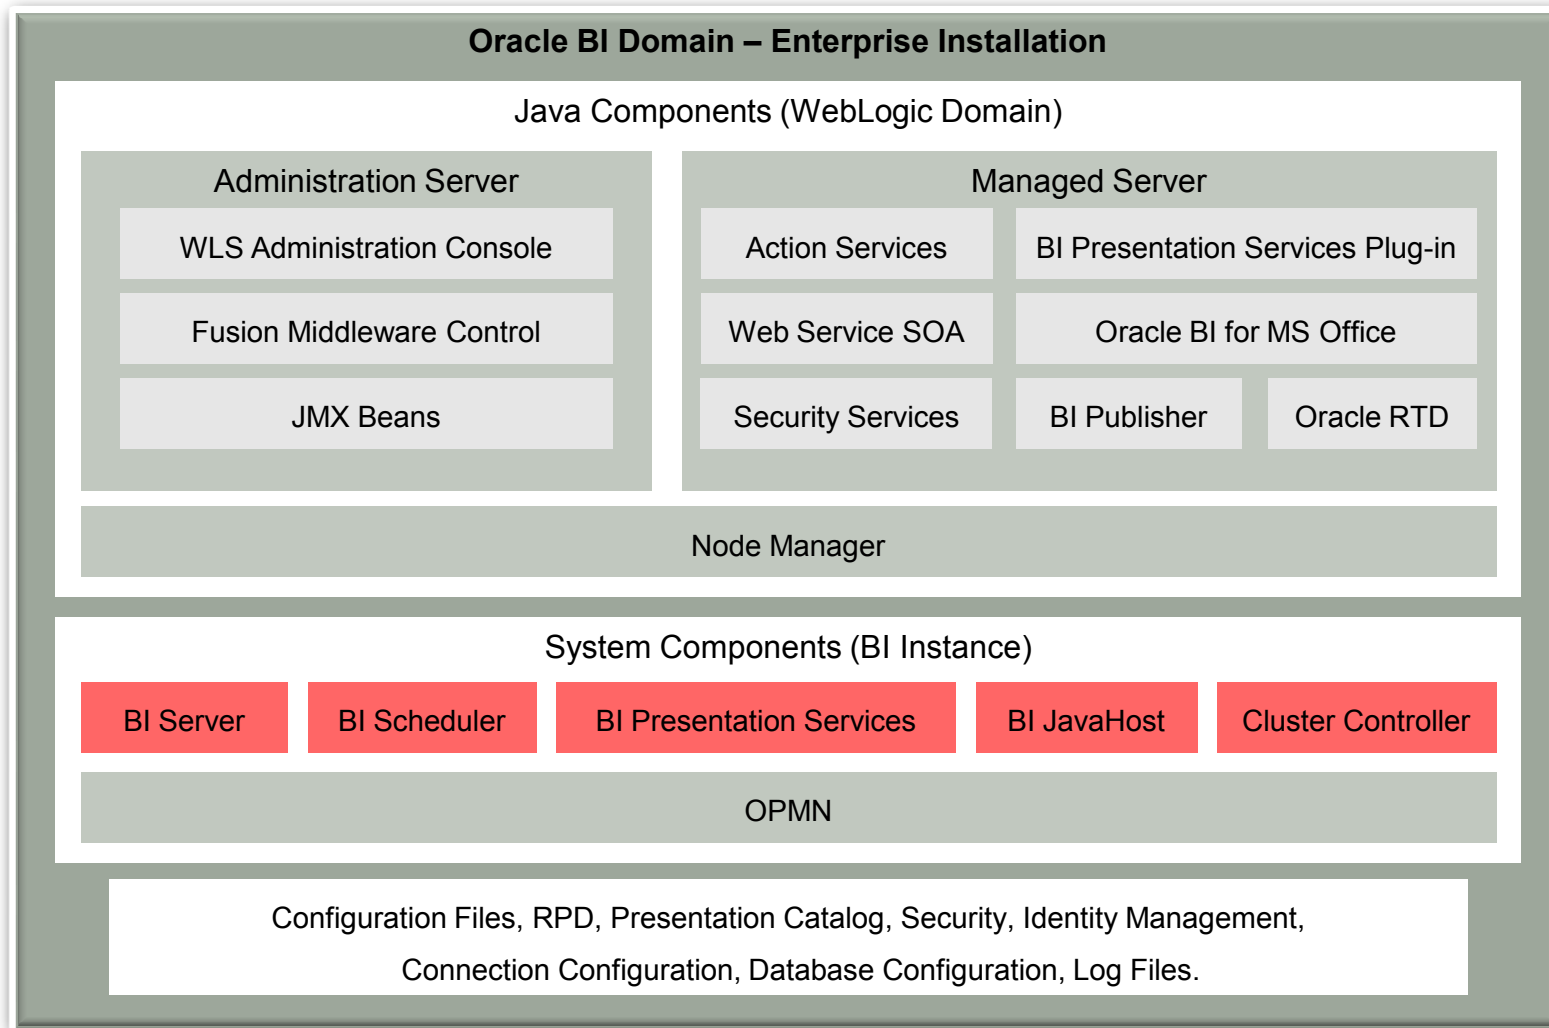

Oracle Business Intelligence Components

Managed Server Components

- **Oracle BI Presentation Services Plug-in**
 - Routes HTTP and SOAP requests to Oracle BI Presentation Services
- **Oracle BI Action Services**
 - Web services required by the Action Framework
- **Oracle BI Security Services**
 - Integration of the Oracle BI Server with the Oracle Fusion Middleware security platform
- **Oracle BI for Microsoft Office**
 - Integration between Oracle Business Intelligence and Microsoft Office products
- **Oracle BI Publisher**
 - Enterprise reporting solution for authoring, managing, and delivering all types of highly formatted documents
- **Oracle Real-Time Decisions (Oracle RTD)**
 - Analytics software solutions allowing companies to make better decisions in real time
- **Oracle BI SOA Services**
 - Invoke OBI functionality from Business Process Execution Language (BPEL) processes

Oracle BI 11g – High Level Architecture

Enterprise Installation

Oracle Business Intelligence Components

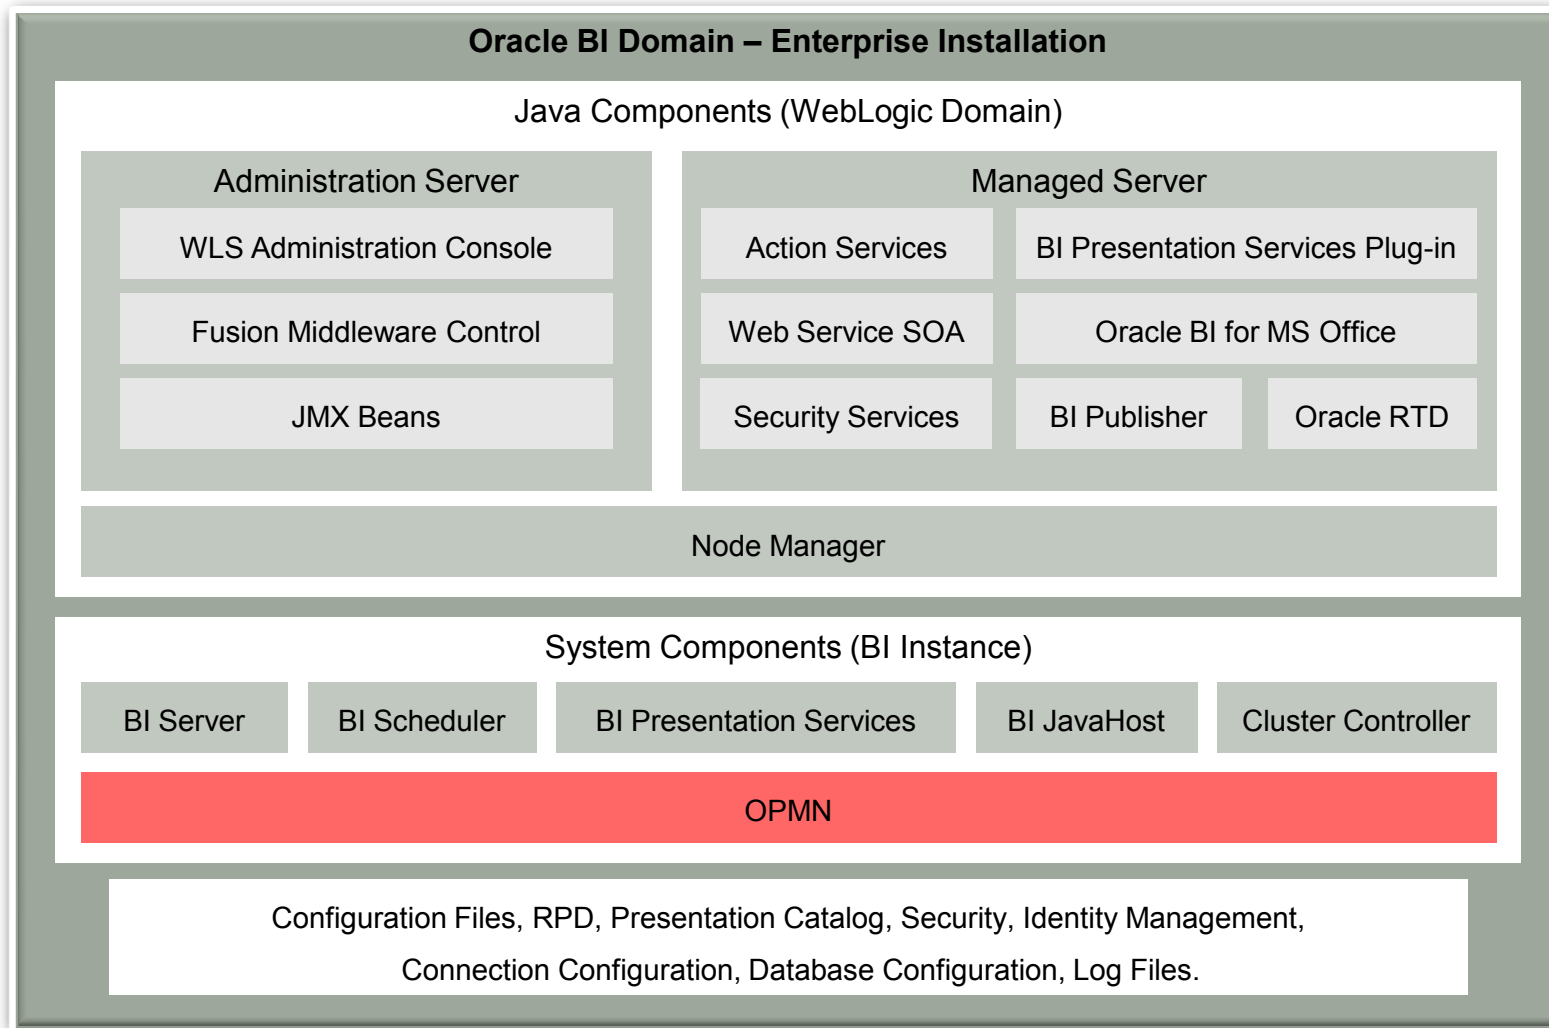

System Components

System components are deployed as non-JEE components (C++ and J2SE)

- **Oracle BI Server**
 - Query and data access capabilities at the heart of OBI
 - Provides services for accessing and managing the enterprise semantic model (.rpd)
- **Oracle BI Presentation Services**
 - Framework and interface for the presentation of BI data to Web clients
- **Oracle BI Scheduler**
 - Scheduling for analyses to be delivered to users at specified times
- **Oracle BI JavaHost**
 - Supports various components such as Java tasks for Oracle BI Scheduler, Oracle BI Publisher, and graph generation
 - Also enables Oracle BI Server query access to Hyperion Financial Management and Oracle OLAP data sources
- **Oracle BI Cluster Controller**
 - Distributes requests to the BI Server
 - Ensuring requests are evenly load-balanced across all BI Server process in the BI domain

Oracle BI 11g – High Level Architecture

Enterprise Installation

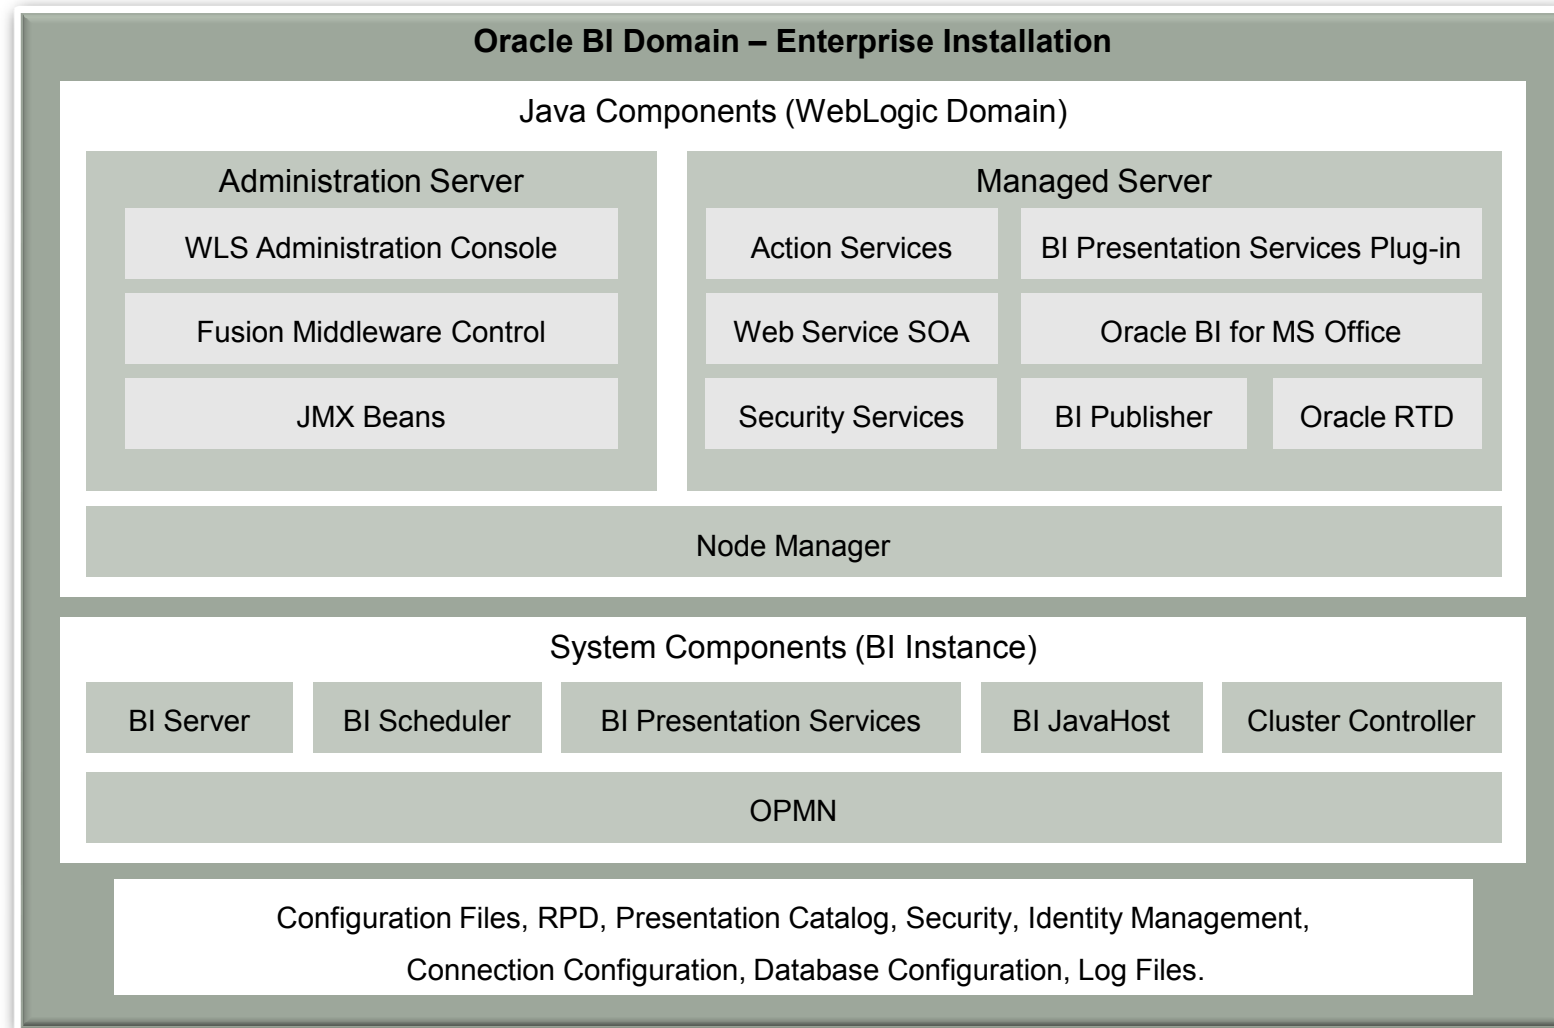

Oracle Business Intelligence Components

Oracle Process Manager and Notification Server (OPMN)

- **OPMN**
 - Manage system components for Oracle Business Intelligence (for advanced users)
 - Supports both local and distributed process management
- **OPMN and Fusion Middleware Control**
 - Fusion Middleware Control is the recommended approach for starting, stopping, and viewing the status of components
 - OPMN is suitable only for advanced users

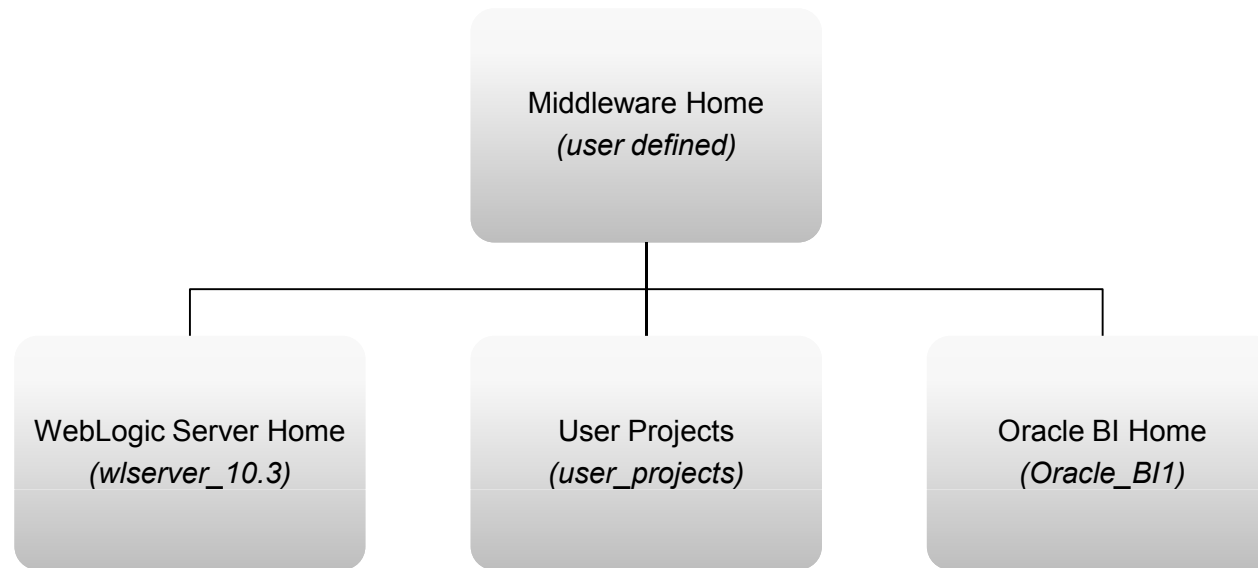

Oracle BI 11g – High Level Architecture

Enterprise Installation

Oracle Business Intelligence

Basic Directory Structure

- **WebLogic Server home**
 - WebLogic Server home
 - Contains Java components
- **User Projects**
 - contains product domains (including one or more Oracle Business Intelligence domains), Administration Server, and one or more Managed Servers
- **Oracle BI Home**
 - Contains all the binary files (read-only) that are specific to Oracle Business Intelligence

Oracle Business Intelligence Components

Some Useful Directories of the BI Instance

- Repository
 - %Middleware Home%\instances\instance1\bifoundation\OracleBIServerComponent\coreapplication_obis1\repository
- Web Catalog
 - %Middleware Home%\instances\instance1\bifoundation\OracleBIPresentationServerComponent\coreapplication_obis1\catalog
- NQSConfig.ini
 - %Middleware Home%\instances\instance1\config\OracleBIServerComponent\coreapplication_obis1\repository
- instanceconfig.ini
 - %Middleware Home%\instances\instance1\config\OracleBIPresentationServerComponent\coreapplication_obis1\catalog
- BI Server Logs (nqserver.log, nqquery.log)
 - %Middleware Home%\instances\instance1\diagnostics\logs\OracleBIPresentationServerComponent\coreapplication_obis1

Oracle Business Intelligence

Quick Performance Tip (for Simple Install)

Try tuning some of the startup parameters located in two files in the directory:

- %Middleware Home%\user_projects\domains\bifoundation_domain\bin

- **setDomainEnv.cmd**

- set XMX_SUN_64BIT=**1536**
- if "%JAVA_VENDOR%"=="Sun" (
 - set WLS_MEM_ARGS_64BIT=-Xms**1024**m -Xmx**1536**m
 - set WLS_MEM_ARGS_32BIT=-Xms256m -Xmx512m) else (
 - set WLS_MEM_ARGS_64BIT=-Xms**1024**m -Xmx**1536**m
 - set WLS_MEM_ARGS_32BIT=-Xms512m -Xmx512m)
- set MEM_MAX_PERM_SIZE_64BIT=-XX:MaxPermSize=**1536**m

- **setOBIDomainEnv.cmd**

- if "%SVR_GRP%"=="obi" (
 - @REM set memory args depending on java vendor
 - if "%JAVA_VENDOR%"=="Sun" (
 - set MEM_ARGS=-Xms**1024**m -Xmx**1536**m -XX:MaxPermSize=**1536**m)
 - if "%JAVA_VENDOR%"=="Oracle" (
 - set SERVER_MEM_ARGS=-Xms**1024**m -Xmx**1536**m))

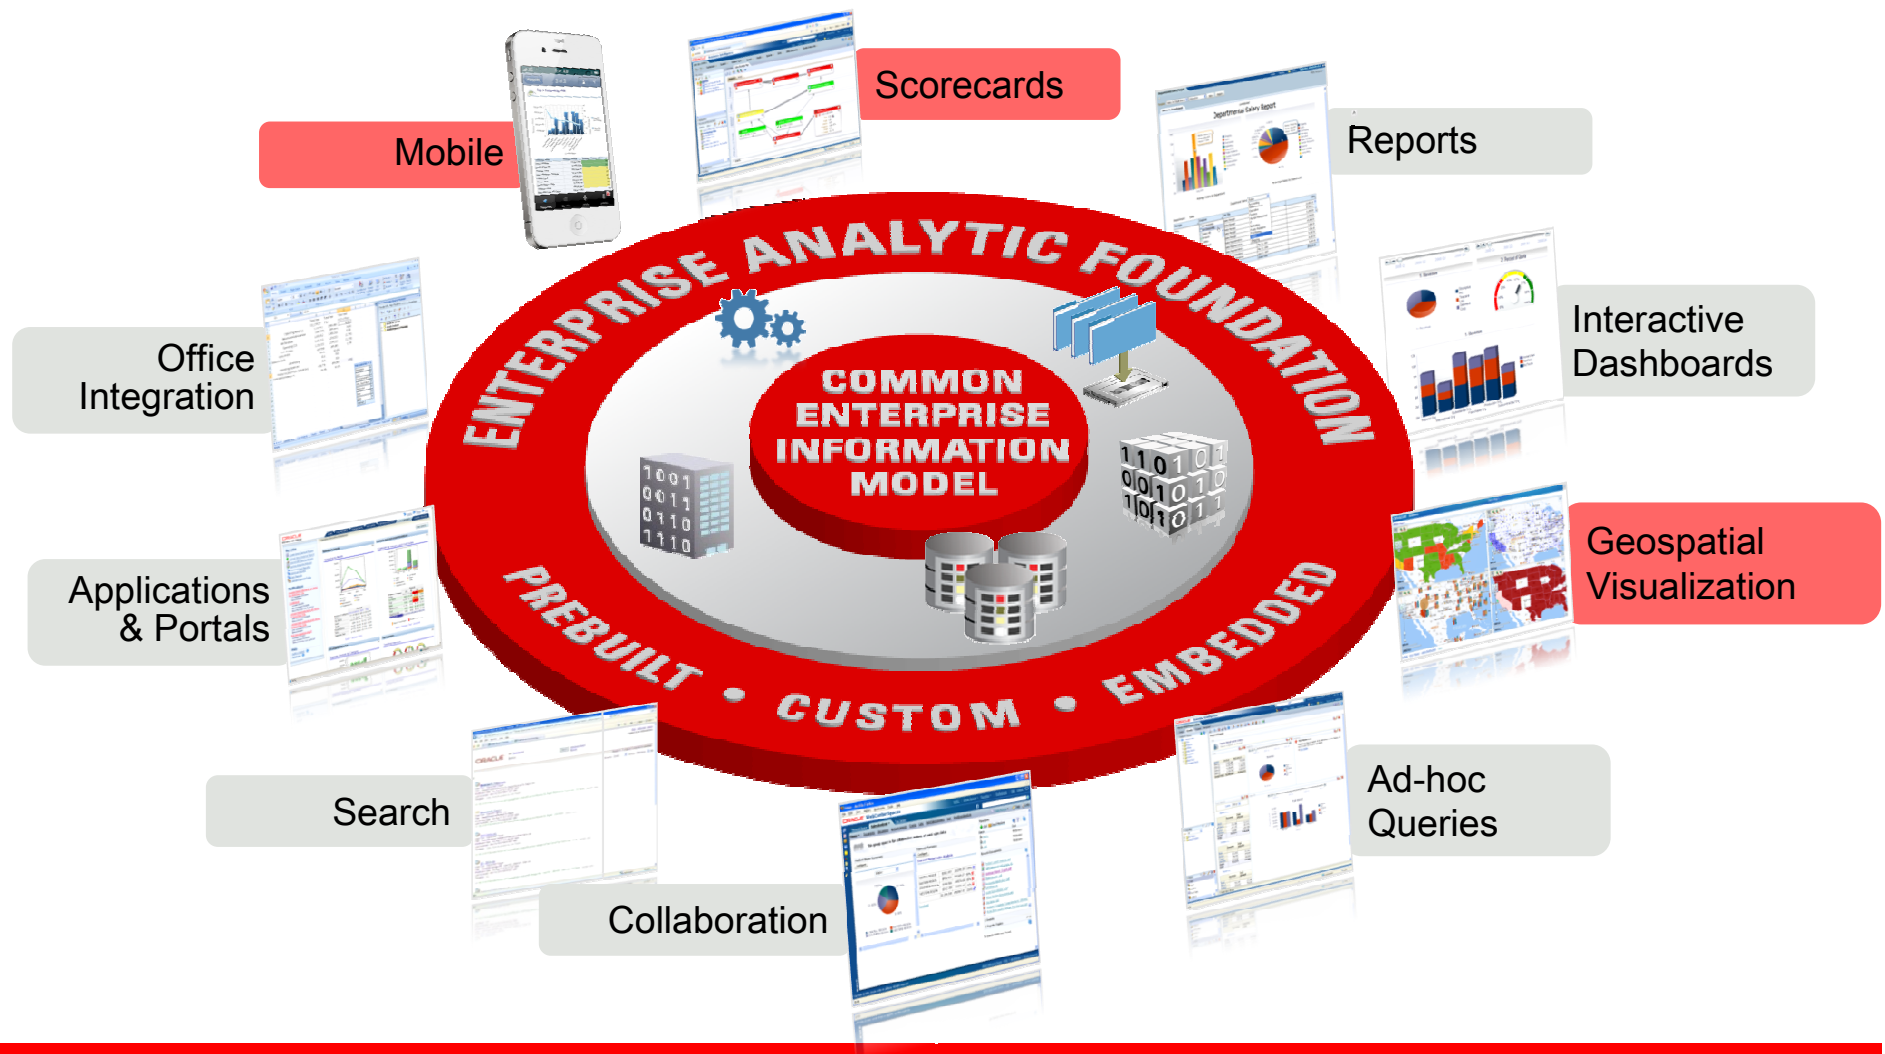

New Visualizations

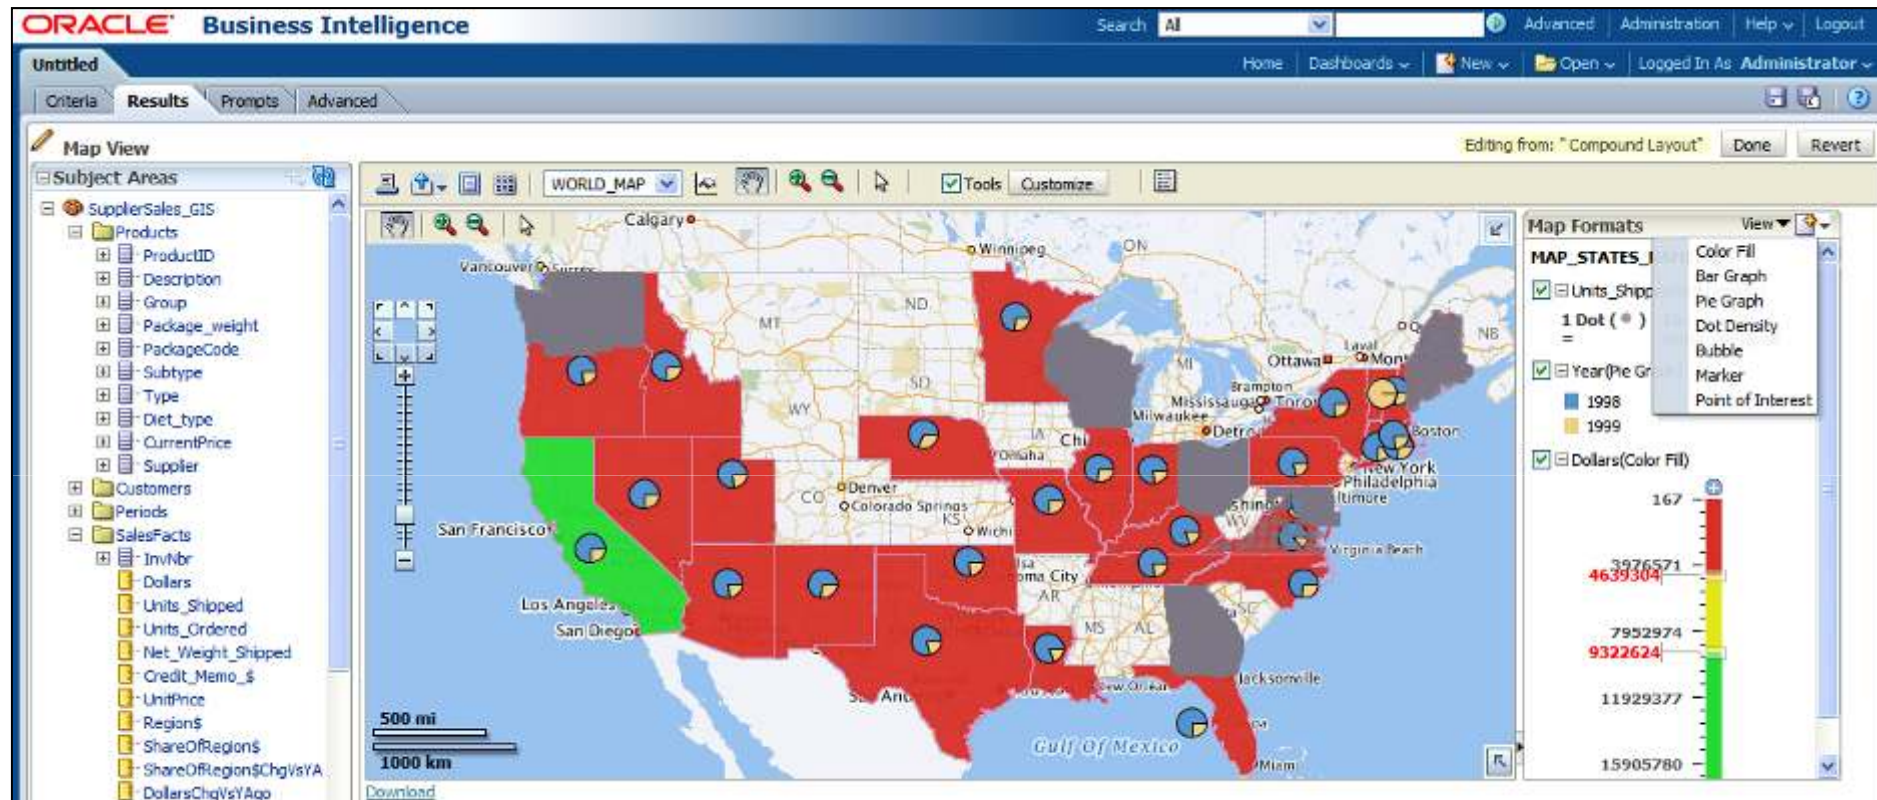

ORACLE®

Oracle Business Intelligence

New Features

Interactive Spatial Visualization

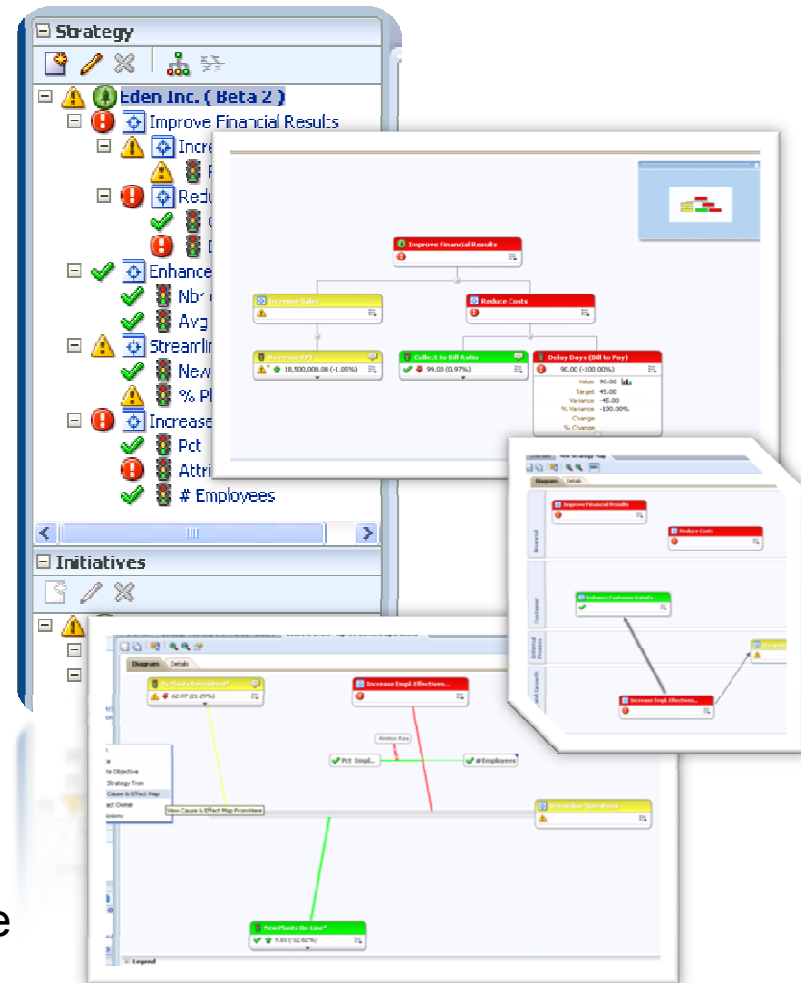

- Many mapping visualizations
- Multiple layers
- Interactive map controls

Oracle Scorecard and Strategy Management

Strategy Management & Goal Setting

- Integrated BI component
 - KPIs as core metadata
 - Thresholds, owners, history
 - Auto-generated interactive analyses
 - Linked objectives & initiatives
- Automatic detection
 - KPI alerts triggered by thresholds
- Strategy visualization
 - Strategy Maps and Trees
 - Cause and Effects
 - Watchlists
 - Annotations & override
- All methodologies
 - Balanced scorecard, six sigma, Baldrige

Oracle Business Intelligence Mobile

- Content dynamically optimized for target devices
 - Collapsing a multi-column Dashboard into a single column
 - Segmenting out into smaller pieces for widget-style consumption
- Fully Integrated
 - Integrated security
 - Leverages SSL and SSO

ORACLE®
